p_s
$Lp(x,t\,|\,x_0,0)$
$(x-x_0)/L$
(b)
line: g
$n=\pm1$ terms
circle: sum of all
Lp
lift $(\tilde{x}-x_0)/L$
(c)
even about x_0
odd about x_0
$\lambda/(2\pi^2 D/L^2)$
circle, length L
reflecting $(0, L/2)$
absorbing $(0, L/2)$
